DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or make obvious the inventions of claims 1-5, 9-12, and 17, including, *inter-alia*, an airway adapter configured to attach to a light-emitting carbon dioxide sensor comprising a case adapted to be disposed below a patient's nostrils and having an air passage that crosses the optical axis of a light beam from a sensor between the patient's nose and mouth, and a mouth guide that defines a space in communication with the air passage, where the mouth guide is adapted to be disposed in front of the patient's mouth and pivots on the air case along an axis parallel to the optical axis of the sensor.

Yamamori (US Patent Application Publication 2002/0122746) discloses a similar system, as discussed in previous actions, but Yamamori's mouth guide does not pivot along an axis parallel to the sensor's optical beam axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
